

Keller Education

Our **Top 10** for Teachers

These ten presentations are our **most requested, most loved, and most impactful** - empowering educators to create classrooms where curiosity, connection, and confidence thrive.

Choose your topic, duration and method.

Each of these sessions can be booked as a:

60-90 minute **online session**,

or as an **in-person workshop** for 60-90 minutes, or 3 hours.

After each session, schools receive a summary document capturing key learning and simple, **practical application ideas**.

And because every session is **SACE-accredited**, your teachers not only grow in confidence and skill - they also earn those valuable **CPTD points!**

Hot Topics

My Inquiry Toolkit

From curiosity to competence. Drawing on multiple layers of world leading research, this session equips teachers with an inquiry mindset and practical strategies to deepen classroom planning and practice. Learn how to transform questions into powerful engines of learning.

Student Voice in the Classroom

Hand the mic to your learners. This presentation unpacks how student-led conferences, amongst other tools, empower children to reflect, self-assess, and take ownership of their progress - turning reporting into a celebration of growth.

AI as a Jetpack for Learning

Cut through the noise of AI hype. This workshop gives educators clarity and focus, showing how to harness AI tools to boost creativity, save time, and sharpen teaching impact, without losing the human touch.

Growing Gritty Minds

Struggle is not failure, it's the pathway to mastery. Discover how passion and resilience combine to form grit, and why letting learners stumble is the greatest gift we can give them in a world of quick fixes.

Kids & Teens Who Challenge Us

Every behaviour tells a story. In this eye-opening session, teachers learn to decode the hidden messages behind challenging behaviour and respond with empathy, strategy, and confidence.

Creating Invitational Environments

Where curiosity, safety, and attention meet. Explore how the Triune Brain shapes learning and discover how to design classrooms that feel safe, engaging, and learning ready. Connect daily practice with the 6 Global Competencies to build confident, capable learners who feel invited to participate and grow.

Zip the Crocodile

The brain made simple! Gain a fun, practical understanding of how the brain works - knowledge you can use daily to manage emotions, guide learning, and unlock potential.

Differentiation in Today's Classroom - The Myth of Normal

Drawing from Todd Rose's End of Average and Arthur Toga's brain development research, this session challenges traditional labels and grading systems. Teachers will discover six simple, high-impact hacks to make lessons more inclusive, engaging, and brain-friendly without extra workload.

Happy Teachers, Healthy Classrooms

Joy is contagious. Explore how teacher wellbeing, laughter, and simple mindset shifts ripple into every corner of the classroom, creating happier learners and healthier schools.

The Emotional Brain and the Power of Emotional Literacy

In the age of AI, emotional intelligence matters more than ever. Learn why developing socio-emotional skills is a non-negotiable, and how teaching emotional literacy transforms learners' lives.
